Irrigation System Uniformity Evaluation Sign-Up

The Kalamazoo Conservation District is offering irrigation system uniformity evaluations to agricultural producers to assist in efficient water use management, to satisfy the requirements of the Irrigation GAAMPs (Generally Accepted Agricultural & Management Practices) and to maintain or achieve MAEAP verification. The goal of these irrigation evaluations is to determine the uniformity of a system and assure that it applies the same amount of water to all areas of the field. The cost to complete this service is 50 cents per foot.

These evaluations will be performed on a first come, first serve basis. There are a limited number of days available to complete these evaluations each year. We request that if you are interested, please return this form to our office as soon as possible so we can get you on our schedule.

Name: _____

Address: _____

Cell Phone: _____ Email: _____

System Information and Cost:

1. Length, including end gun: _____ feet X \$0.50 = ***no cost for first system**

Location: _____

Map attached showing location? Yes or No

2. Length, including end gun: _____ feet X \$0.50 = \$ _____

Location: _____

Map attached showing location? Yes or No

3. Length, including end gun: _____ feet X \$0.50 = \$ _____

Location: _____

Map attached showing location? Yes or No

Total Feet (including end gun): _____ feet X \$0.50 = \$ _____

***max length of system completed under cost share is 1,000 feet**
